

Classroom or online training course 2 day course outline

This course covers the following topics (any items marked with a * will be covered if time allows):

Data model basics

- · Importing data
- · Creating a data model

Writing DAX

- · Basic DAX syntax
- · Referring to columns
- · Commenting code
- · Code layout

Calculated columns in DAX

- · Creating calculated columns
- IF and SWITCH
- · Showing RELATED data
- Dealing with blanks

Basic measures

- · Creating measures
- Understanding filter context
- Using a measures table

AggregateX Functions

- · Iterator functions
- · Aggregating expressions

The CALCULATE function

- Manipulating filter context
- · Adding filters
- · Removing and replacing filters

Variables

- · Declaring variables
- · Returning a result
- Debugging with variables

The FILTER function

- · Calculating a table
- · Adding filters
- FILTER vs. CALCULATE

Filters and relationships (*)

- · Cross filter direction
- · Filter propagation
- The CROSSFILTER function

Context transition

- Context transition in calculated columns
- · Context transition in measures
- Implicit context transition

Time intelligence

- · Automatic calendars
- Time intelligence functions

Custom calendars

- · Creating custom calendars
- · Financial years
- Multiple relationships

Dynamic measures

- · Dynamic titles
- The SELECTEDVALUE function
- · Disconnected slicers

Maximum 6 people per course. Scheduled classroom courses include lunch at a local restaurant; you can see how our online training works here. For more information, see https://www.wiseowl.co.uk/.
