# **Advanced VBA**

Classroom or online training course 2 day course outline

This course covers the following topics (any items marked with a \* will be covered if time allows):

#### **Revision of VBA**

- · Objects and collections
- Methods and properties
- Using object variables
- · Looping over collections

### Links to other applications

- Referencing other applications
- · Instantiating objects
- Writing inter-application code

### **FileSystemObjects**

- · Referencing FileSystemObjects
- · Working with files and folders

## **FileDialogs**

- Using FileDialogs
- Allowing multiple selection

#### Working with text files

- Avoiding using INPUT/OUTPUT
- · Reading and writing text files

#### Class modules

- What is a class?
- · Designing classes
- · Creating properties and methods
- · Consuming classes

### Advanced class modules topics (\*)

- Untyped collections
- · Creating typed collections
- Creating event sinks

## Linking to data

- ADO or Access Database Engine
- · Referencing the right library
- · Opening and using recordsets

#### **Arrays**

- · Creating and populating arrays
- Dynamic arrays
- The PRESERVE keyword

## **Passing arguments**

- ByRef and ByVal
- · Using optional arguments
- Using ParamArray

#### **Functions**

- · Declaring functions
- · Passing arguments

#### Advanced programming ideas (\*)

- · Using functions in code
- · Recursive programming
- Enumerations

## Working with shapes (\*)

- · Adding shapes
- Positioning shapes
- · Formatting shapes

Maximum 6 people per course. Scheduled classroom courses include lunch at a local restaurant; you can see how our online training works here. For more information, see https://www.wiseowl.co.uk/.
