

This course covers the following topics (any items marked with a * will be covered if time allows):

How classes work

- Object-oriented programming
- Inheritance
- Instantiation of objects

Creating classes

- Defining classes
- The `__init__` method
- Other built-in methods

Properties

- Global and class properties
- Getting and setting values

A case study

- The case study problem
- Designing the classes
- Coding the classes
- Consuming the classes

There will be no more than 5 people on the course. All of our public (scheduled) courses include lunch at a local restaurant. For more information, see www.wiseowl.co.uk/courses/python-classes.htm.
